The Child Behavior Checklist for Ages 1 1/2-5 (CBCL 1.5-5) was completed by Daniela Fernandez, Anna's mother, to obtain her perception of Anna's problems.

On the CBCL 1.5-5 problem scales, Anna's Internalizing Problems, Externalizing Problems, Total Problems and Stress Problems scores were all in the normal range for girls aged 1. Her scores on the Anxious / Depressed, Somatic Complaints, Withdrawn, Sleep Problems, Attention Problems and Aggressive Behavior syndromes were in the normal range. Her score on the Emotionally Reactive syndrome was in the borderline clinical range (93rd to 97th percentile). These results indicate that Daniela Fernandez, Anna's mother reported more problems than are typically reported for girls aged 1, particularly problems of Emotionally Reactive nature.

On the CBCL/1.5-5 - DSM-Oriented Scales, Anna's scores on all rated scales were in the normal range.

On the CBCL/1.5-5 - Language Development Survey for Ages 18-35 Months, Anna's Vocabulary score for 18-23 months was at the 60th percentile, which suggests normal vocabulary development for children aged 18-23 months.
