APPLICATION FOR LICENSE TO REPRODUCE ASEBA SCORING (ACADEMIC RESEARCH ONLY)*

A Scoring License gives you permission to use ASEBA's raw-to-*T*-score conversion tables, provided as Excel look-up tables, so that you can calculate ASEBA scores using a statistical program of your choice, such as R, SPSS, Python, SAS, or Stata. You will set up and run the scoring yourself, and you are responsible for confirming that the scores your program produces match the scores that ASEBA software would produce.

We strongly recommend that ASEBA forms be scored by the standard methods available for purchase at www.ASEBA.org, including ASEBA's rigorously tested scoring software. Technical support for these scoring methods is available Monday – Friday, 8:00 – 4:00 Eastern time, excluding U.S. holidays. ***Completion of this application is not necessary if you use one of the standard ASEBA scoring methods.***

A Scoring License is a manual and technical alternative to ASEBA software. It is not designed to be the simpler or faster option. As a licensee, you are responsible for building your own program, validating it against ASEBA's output, and maintaining it for the length of your study. **Please read the rest of this page before deciding that a Scoring License is the right choice for your study.**

What a Scoring License covers

A Scoring License covers a **single research study or program** named in your application. If your aim is to add ASEBA scoring to your own software, create commercially available software, or provide scoring across more than one study, you would need to request access to a Scoring API subscription. If you are interested in the Scoring API, please contact us, and we can answer any questions you may have and/or provide a quote.

The application on the following page asks you to name any third-party software or platform involved in your study and describe your proposed scoring environment in the relevant section below. Please complete that section fully. Failure to do so will result in a rejected application.

Deliverables and requirements

If your application is approved for a Scoring License, you will receive an ASEBA Score Comparison Data Suite with your License, applicable to all form-types except the Brief Problem Monitor. You must use this Suite to compare scored output from your non-ASEBA scoring program with scores produced by ASEBA software. Each Suite includes:

- Scripts that describe various test conditions for the ASEBA form licensed to you
- PDF files of ASEBA forms with ratings for each test condition
- A set of unscored data for test conditions in several formats to import into your software. The data set includes a file of *T* scores for each gender/age group (e.g., 4 gender/age groups for the CBCL/6-18)
- A set of scored data based on the unscored data set to facilitate comparison with scores produced by your software
- File format definitions for both unscored and scored data sets
- Excel® *T*-score look-up tables, plus percentile look-up tables and a Manual for the ASEBA form licensed to you.

Scoring Licenses are available for the following current ASEBA forms:

- Child Behavior Checklist/1.5-5
- Caregiver-Teacher Report Form/1.5-5
- Child Behavior Checklist/6-18
- Teacher's Report Form/6-18
- Youth Self-Report/11-18
- Brief Problem Monitor Forms for Ages 6-18 (BPM-P, BPM-T, BPM-Y)
- Adult Behavior Checklist/18-59
- Adult Self-Report/18-59
- Brief Problem Monitor Forms for Adults (BPM/18-59)
- Older Adult Behavior Checklist/60-90+
- Older Adult Self-Report/60-90+

Please note: Scoring Licenses are typically granted in conjunction with a Site License to reproduce ASEBA® forms and shall only be granted for a specifically named program or study. If you do not already have a Site License, please fill out a related Site License application.

* This license is restricted to academic research use. Applicants must be faculty, staff, or students at an accredited academic institution, or researchers whose project is funded or sponsored by such an institution. Research funded as a whole or in part by a commercial entity, including industry-sponsored clinical trials, is not considered academic research under this license, even when conducted at or in partnership with an academic institution. Applicants must include one of the following: a letter on institutional letterhead confirming the applicant's position or affiliation, or a copy of a grant award or funding notice naming the institution. Applications without supporting documentation will not be considered.

User Qualifications

The proper clinical and research use and interpretation of ASEBA instruments require knowledge of the theory and methodology of standardized assessment, as well as supervised training in working with the relevant kinds of clients. The training required may differ according to the ways in which data are to be used. Graduate training of at least the Master's degree level would ordinarily be expected. No amount of prior training can substitute, however, for professional maturity and a thorough familiarity with the procedures and cautions presented in ASEBA Manuals.

Normative Scoring Development

Norms for all available forms were developed using the 1999 National Survey. Most norms were developed in 2001, but subsequent revisions were made throughout the 21st century. Included in these changes were updates to the names of scales, removal of certain problem items, and updated DSM-oriented scales following the release of the DSM-5.

ASEBA is currently in the midst of a multi-year renorming project, with a release date as yet to be determined. We anticipate they will be available in the next couple of years, but we stand by the integrity of our current norms, which are used all around the world, in various cultural contexts and professional, research, private practice, and school settings. ASEBA scores have shown little change for population samples obtained in different decades in the US and other countries. Though we anticipate some changes to the norms and the potential addition of new forms, our customers will still have the option to use previous norms once the new ones are released, as the volume of research that supports their legitimacy is substantial.

Please note that **new norms will not be available via a Scoring License**, and Scoring Licensees will not be entitled to access to new norms through any Agreement. New norms will be immediately available to users of our digital scoring tools.

ASEBA Scoring License Application

If you wish to apply for a License to reproduce ASEBA scoring, please provide the information below to enable us to determine License eligibility and cost. Mail application to mail@aseba.org

Note: Any customization of the License Agreement may incur a customization fee of $300.

Application Date: _____

Name:	**Title:**	**Academic Organization:**
Note: Please put the name of the licensee (person or organization) who will be responsible for the study/program, and not the person processing the paperwork.		

Street:	**City:**	**State:**	**Zip:**	**Country:**

E-Mail:	**Telephone:**

☐ **I confirm this project is an academic research study.**

☐ **I confirm this project receives no funding from commercial or industry sources.**

Name of study or program in which the ASEBA forms will be used:

ASEBA normative scores will be integrated into the following program: ☐ R ☐ SPSS ☐ Python ☐ SAS ☐ Stata ☐ Excel

☐ Proprietary software (describe)_____ ☐ Other third-party software (describe)_____

Licensed scoring will be used between: Start Date: _____ **and End Date:**_____

This section must be completed. Licenses are given for a maximum of three years, and may be extended for a similar period prior to the end of each expiration date.

Have you received a License to reproduce ASEBA forms? ☐ No ☐ Yes – If Yes, License#_____

List forms to be scored:

Name of Form	**Ages**	**Number of Forms to be Scored**
Total Number of Forms to be Scored for Entire Project		

Detail the reason(s) for developing a non-standard ASEBA scoring model. Include proposed scoring method/environment:

Scoring Resources to order (selection required):

If your License is granted, your total charge will include the cost of the resource(s) you select below.

☐ Option 1 -> Electronic *T*-score files in Excel® format for current forms. ***$350 for each type of form (except BPM/6-18).***

Please check each *T*-score set you wish to purchase:

☐ Child Behavior Checklist/1½-5 + LDS
☐ Caregiver-Teacher Report Form/1½-5
☐ Child Behavior Checklist/6-18
☐ Youth Self-Report/11-18
☐ Teacher's Report Form/6-18
☐ BPM/6-18 (BPM-P, BPM-T & BPM-Y - all BPM forms for $350)
☐ Adult Behavior Checklist/18-59
☐ Adult Self-Report/18-59
☐ Brief Problem Monitor/18-59
☐ Older Adult Behavior Checklist/60-90+
☐ Older Adult Self-Report/60-90+

☐ Option 2 -> ASEBA Scoring API

If different from applicant, Site Manager who will ensure that conditions of License are followed:

Site Manager's Name:	**Title:**
